

Estonia has lithium battery packs

Overview

Will Estonia become the largest Battery Park in continental Europe?

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, marking a crucial step toward synchronizing the Baltic power grids with the rest of Europe by 2025.

Why are lithium-ion batteries gaining space in Estonia?

When countries are trying to reduce their greenhouse gas emissions for meeting the climate targets, the role of energy storage would be crucial. Lithium-ion batteries are also gaining space in Estonia to reduce dependence on other countries for power and to ensure a cleaner energy mix in line with its goal to build more battery parks.

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

Can storage systems help reduce energy consumption in Estonia?

Estonia's climate minister, Yoko Alender, emphasized the role of storage systems in this transition, stating, "Estonia has a clear goal – by 2030, the amount of electricity we consume must come from renewable sources.

Does Eesti Energi have a Bess battery?

Estonia utility Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS with LG Energy Solution to provide the batteries.

What is the Baltic storage platform?

The project, spearheaded by the Baltic Storage Platform—a joint venture between Estonian energy company Evecon, French solar producer Corsica Sole, and sustainable finance management company Mirova—aims to bolster energy security and support Estonia’s transition to renewable energy.
