

Estonia mobile power station power generation

Overview

In August 2022, Eesti Energia announced the start of development for Estonia's first pumped-storage hydroelectric power plant (PSH). The project is located in the Estonia Mine industrial area in Ida-Virumaa and aims to become operational by 2026. Overview Energy in Estonia has heavily depended on . and Estonia are two of the last countries in the world still . Estonia has set a target of 100% of electricity p.

The National Energy and Climate Plan published in 2019 aims to reduce greenhouse gas emissions by 70% by 2030 and by 80% by 2050. Renewable energy must be at least 42%, with a target of 16 TWh in 2030. .

Amidst geopolitical tensions, Estonia took decisive action to reduce its reliance on Russian energy sources, particularly in response to Russia's invasion of Ukraine. Previously heavily dependent on Russian imports for.
