

Estonian rooftop photovoltaic panel manufacturer

Overview

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

How much does a roof cost in Estonia?

Eastland said roofing material he was able to source in Estonia came in at around 60 percent less than originally budgeted four (though still coming in at £118,000, or nearly €138,000).

What are building-integrated photovoltaics (BIPV)?

These materials are called building-integrated photovoltaics (BIPV). Unlike traditional solar panels, Solarstone products do not need a conventional roof underneath. Seven years later, Solarstone's production has grown from tailor-made roofs to mass production of about a thousand roofs per year.

Can solar panels on roofs be aesthetic?

Solar panels on the roofs can be aesthetic to look at for the naked eye – three guys, the founders of Estonian CleanTech startup Solarstone, figured out how this can be done.

What is a fully integrated solar roof?

That's a promise. Our fully integrated solar roof is optimized for the aesthetical design of the whole house. The sleek vertical lines of a classy black roof will give your house an aesthetic look and blend in seamlessly with any neighborhood. Cutting-edge solar cells are integrated directly into high-quality metal sheets.

Can a solar panel be used as a roof?

Their first of its kind product is called Click-on, which makes it possible to render essentially any solar panel into 2-in-1 weatherproof roofing material without any additional sublayer. Click-on is universal and can be used for residential and commercial roofs as well as solar halls, carports, and facades.
