

Fiji Light New Energy Storage

Overview

How does Fiji provide access to modern energy?

The access to modern energy to rural or remote islands and villages in Fiji is made possible by external aid; namely Chinese, Japanese, US, Korean, Turkish governments, to name a few. The technologies and expertise is provided by external aid. This assists GoF to install and commission renewable energy projects.

What is the energy demand in Fiji?

The energy demand in Fiji is steadily increasing, driven by population growth, economic development, and a push toward industrialisation. Urban centres such as Suva and Nadi account for the majority of energy consumption, while rural areas often depend on decentralised and off-grid solutions.

How can Fiji provide universal electricity access?

Fiji aims to provide universal electricity access through the Fiji Rural Electrification Fund. This goal requires significant investment in: Decentralised solar and mini-grid systems. Micro-hydropower projects for remote communities. Energy storage solutions to enhance reliability. With the integration of renewables, there is a growing need for:

Where does Fiji use the most energy?

Urban centres such as Suva and Nadi account for the majority of energy consumption, while rural areas often depend on decentralised and off-grid solutions. The Fijian government has set a bold target to achieve 100% renewable energy by 2036, as outlined in the National Energy Policy (NEP).

Who is Energy Fiji Limited?

Energy Fiji Limited is a company established in 1966 under the Electricity Act of 1966. It began operating from 1 August of that year and was previously known as the Fiji Electricity Authority.

Does Fiji rely on fossil fuels?

However, the NEP notes that Fiji retains a heavy reliance on imported fossil fuels, particularly in the transport sector. The NEP sets out a vision for Fiji's energy sector as: A resilient resource-efficient, cost-effective, accessible, reliable and environmentally sustainable energy sector for all Fijians.
