

Finished distribution cabinet container base station

Overview

What is a containerised substation?

Containerised substations are constructed and tested at our factory to allow quick 'plug and play' installation and commissioning on-site. We sell and hire containerised equipment on a 'supply only' basis, or with optional on-site installation, cable works and commissioning by our own Contracting division. Looking for containerised solution?

.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.

What is a kabledon distribution board?

Kabledon distribution boards are specifically designed for outdoor installations and they come as pre-assembled systems, ready to install. They combine the advantages of the flexible IP-system with robust and reliable distribution cabinets, and they deliver efficient use of space, quick installation and significant customer value.

How does a pre-fabricated building benefit a substation?

The pre-fabricated building shelters the equipment from environmental influences, thus increasing substation availability and reliability. Fences can be omitted, which simplifies permitting, while enhancing the substation's aesthetic appearance.

Why is Hitachi energy developing a pre-fabricated Indoor Substation?

Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated

indoor substations.

What is a custom built containerised solution?

Discuss your requirements with our experts today. Custom built containerised solutions, available for purchase or long-term hire, are designed and built to your specification using any combination of new or refurbished transformers, switchgear and ancillary equipment to meet your exact requirements.

Finished distribution cabinet container base station

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5
