

# Flexible photovoltaic panel bending degree

## Overview

---

In general, most flexible solar panels can be bent to a radius of curvature of between 10 and 30 centimeters, which corresponds to a bend angle of between 12 and 36 degrees.

## Flexible photovoltaic panel bending degree

---

### Microsoft Word

The bending degree of the film is fixed, and the influence of the distance between the light source and the film on the electrical parameters of the flexible photovoltaic panel is studied.
