

Foreign telecommunications companies build base stations

Overview

Who will dominate the global base station market in 2022?

A prestigious award from a leading manufacturer. TrendForce estimates that Huawei, Ericsson, and Nokia will account for 74.5% of the global base station market in 2022.

Are telecommunications companies selling their towers to dedicated tower companies?

Major telecommunications firms, such as AT&T, Verizon, and T-Mobile, not only provide mobile services but also own and operate numerous towers. However, the telecom landscape has witnessed a significant trend where these operators increasingly sell their towers to dedicated tower companies to focus on their core business of service delivery.

What is the future of base station technology?

The industry is seeing innovations in both small cell and macro cell technologies, with vendors focusing on developing more efficient, compact, and powerful base station solutions that can support various deployment scenarios from dense urban areas to rural locations.

Which region dominates the 5G base station market?

The Asia-Pacific region continues to dominate the global 5G base station market, with a projected CAGR of approximately 38% from 2024 to 2029. This region represents the most dynamic and fastest-growing market, led by significant deployments in China, Japan, South Korea, and India.

How many 5G base stations are there in China?

The market is witnessing significant developments in base station technology and deployment strategies. By September 2023, China had built 3.189 million 5G base stations, with 22.6 5G stations per 10,000 people, demonstrating the scale of infrastructure deployment possible.

Do foreign telecommunications carriers have market power?

The Commission maintains a “List of Foreign Telecommunications Carriers that Are Presumed to Possess Market Power in Foreign Telecommunications Markets” for purposes of implementing certain of its rules that apply to authorized U.S.-international common carriers (also referred to as U.S.-international “telecommunications carriers”).
