

France s solar panels

Overview

Does France have solar power?

Solar production in mainland France also rose by 48% year-on-year, contributing 5.1% to the national electricity mix. France's solar power sector has achieved a significant milestone, installing 1.4 GW of new solar capacity in the first quarter of 2025. This marks a 60% increase compared to the fourth quarter of 2024, which saw 870 MW added.

Is France incorporating solar energy into its grids?

Numerous countries are incorporating solar energy into their grids to lower energy costs, prevent power losses, and more. And France is one of the leaders of the pack. According to CleanTechnica, data from the French government showed chart-topping growth over the first three quarters of 2024.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

How many solar panels are installed in France?

The total installed capacity in mainland France now stands at 24.4 GW. However, the ministry notes that this represents only 52% of the cumulative capacity targets set for the end of 2025. For a deeper dive into France's solar progress, explore this [France Solar Panel Manufacturing Report](#).

Will France increase its solar power capacity by 2023?

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid

tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

Does France have a photovoltaic market?

This report offers a comprehensive analysis of France's photovoltaic market and developments over the past year. 2023 was a record-breaking year for PV installations in France, with a total of 4.0 GW of new photovoltaic capacity added to the grid, pushing the country's cumulative capacity to 24.5 GW DC.
