

French 5G base station communication equipment

Overview

Which country has the largest 5G network in France?

France's first 5G 3.5 GHz SA network Free currently has the largest 5G mobile network in France, with over 20,000 5G sites in service, including 6,950 3.5 GHz sites. Available in almost 10,500 municipalities, it already covers nearly 95% of the French population.

What is a 5G radio access network?

The 5G Radio Access Network (RAN) is the interface between user devices and the 5G core network. It comprises base stations and small cells that manage radio communications, enabling ultra-fast data transfer and low-latency connections.

What is a 5G base station?

5G base stations operate on various frequency bands, including sub-6 GHz and mmWave, to deliver ultra-low latency, high data throughput, and enhanced capacity. They support massive MIMO (Multiple Input Multiple Output) technology, enabling improved coverage and simultaneous connections for a large number of devices.

Which telco is launching 5G in France?

Free – the first telco to launch VoNR in France With 5G SA, Free is also the first telco in France to launch VoNR (Voice over New Radio) – a new technology that supports voice communication over a 5G network. VoNR brings new benefits to voice communication: faster connection times, lower latency, better voice quality and less battery drain.

How 5G technology is transforming connectivity?

5G technology is revolutionizing connectivity, and the manufacturers of 5G equipment are leading this transformation. From modems and base stations to RAN, antenna arrays, and core networks, these companies are providing

cutting-edge solutions. Leading vendors are offering innovative products to enhance network speed, coverage, and efficiency.

Does free have 5G in France?

Available in almost 10,500 municipalities, it already covers nearly 95% of the French population. Today, Free is announcing that it has deployed 5G SA (Standalone Access) on the 3.5 GHz frequencies of its public network on a national scale. By doing this, it has become the first mobile operator in France to offer this technology to its subscribers.
