

French rooftop solar photovoltaic panels

Overview

Is France a good country for rooftop solar?

France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. France's photovoltaic (PV) policies are developed within the National Low Carbon Strategy and the Energy Programme Decree.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year.

Are solar panels a good investment for French property?

If you require advice and assistance with the purchase of French property and moving to France, then take a look at the France Insider Property Clinic. The installation of solar panels on residential property is a tempting proposition for many owners, but it is not without risk and the rewards are long-term.

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. How much does it Cost to install Solar Panels in France?

.

Why is solar PV mandatory in France?

Mandatory solar: Solar PV is mandatory for living roofs for commercial and industrial buildings or covered car parks occupying 500 m² or more of ground surface. Power to the people: France's current policy framework is supportive

of collective self-consumption and energy communities, with flexible regulations supporting prosumers.

Should you install solar panels on your French property?

The installation of solar panels on your French property is a tempting proposition for many owners, but the rewards are long-term, and it is not without risk. Thermal or Photovoltaic Solar Panels?

At the outset it is important to define the term 'solar panel' as there are two types of panels, which are frequently confused with one another.
