

French solar panel types and prices

Overview

This cost varies according to a number of factors, including the power of the installation, which can range from €5,500 to €30,000 for systems from 3 to 12 kWp, and the type of panels, which cost between €200 and €300 per square meter. How much does it cost to install solar panels in France?

However, as a rule of thumb, the French energy management agency 'ADEME' considers the cost to be €3,000 to €4,500 per kilowatt of power created. As most domestic installations generate around 3k/W of power, this means the cost of the panels themselves is €9,000 to €13,000. For 6 k/W of power expect to pay €16,000 to €19,000.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

What is the VAT rate for solar panels in France?

A reduced VAT rate of 10% instead of the standard 20% applies to solar panel installations in France. This measure is available for residential properties used as primary homes. Many regions in France offer additional subsidies for solar panel installations. These initiatives can significantly lower initial costs.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.

Can photovoltaic solar panels be installed on a roof in France?

Many individuals in France have already chosen to install photovoltaic solar

panels on their roof or in their garden. To succeed in your project, do not hesitate to request several quotes from qualified professionals and compare offers to find the solution best suited to your needs.

How to choose a solar installation in France?

To maximize the production of your solar installation, it is essential to choose the orientation and inclination of your panels carefully. In France, the ideal orientation is due south, with an inclination of approximately 30 to 35 degrees from the horizontal.
