

Gambia energy storage power station revenue

Overview

Why is electricity so expensive in The Gambia?

The average tariff for electricity in The Gambia is one of the highest in the world at \$0.23/kilowatt hour (kWh). This high cost is due to expensive imports of HFO for NAWEC's generators, leading to increased production and supply expenses.

Is biomass a source of electricity in Gambia?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Gambia: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What type of energy is used in Gambia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Gambia: How much of the country's energy comes from nuclear power?

.

How much electricity will Gambia generate in 2025?

The Gambia's Electricity Sector Roadmap (2019-2025) aims to scale up electricity generation to 200 MW of available capacity at peak in 2025, with 14MW expected from the OMVG project with Guinea and Senegal, and 50MW from the Souapiti project and the remainder through Independent Power Producers (IPP).

What is the minimum daily solar production capacity of the Gambia?

The minimum daily solar production capacity in The Gambia is 4kWh solar power radiation per square meter. The National Development Plan (NDP) seeks to increase the share of renewable energy from 2 to 40 percent.

What is the Gambia's goal for 2025?

The Gambia has committed to ambitious plans for 2025, including President Barrow's desire to achieve universal electrical access and a commitment to reduce CO2 emissions in alignment with the 2015 Paris Accords. The focus is on imports from Senegal, Guinea, and Cote d'Ivoire, and domestic solar generation.
