

Georgia Rural Solar Power System

Overview

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

What is Georgia's first utility-scale solar farm?

Commissions first utility-scale solar farm in Georgia history, Social Circle, at the time the largest project east of the Mississippi River (30 MWac) Begins construction on Hazlehurst Solar Farm, our first project to serve Georgia's EMCs through Green Power EMC Commissions a new solar farm in Hazlehurst.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar

participants the option to extend the term of their current Distributed or Utility Scale generation for up 35 years. Please select from the following options for more information surrounding your program.
