Overview

Does qcells have a solar plant in Dalton Georgia?

[ATLANTA, Oct. 18, 2023] – Qcells, an industry-leading clean energy solutions provider, today announced the successful completion of its Dalton, Georgia, factory expansion. Qcells added 2 gigawatts (GW) of solar capacity to Dalton, bringing the full factory’s output to more than 5.1 GW.

What's going on with Georgia's solar industry?

Politics envelops the solar industry. Vice President Kamala Harris visited the plant earlier this year. At the state level, Republican Gov. Brian Kemp has wrestled with Democratic U.S. Sen. Jon Ossoff over political credit for electric vehicle and renewable energy investments flowing to Georgia.

What percentage of Georgia's electricity comes from solar?

Over 4 percent of the state's electricity now comes from solar power. Georgia's energy solutions providers are helping to accelerate the development of renewable energy products by lowering risks, reducing costs, providing access to innovative industry research, and investing in a superior infrastructure network.

Will a new solar glass plant in North Georgia create a strong supply chain?

“SOLARCYCLE’s announcement of hundreds of jobs coming to a new, cutting-edge solar glass plant in North Georgia further cements the Peach State as a national leader in domestic solar manufacturing, and they will play a pivotal role in creating a robust supply chain for the United States emerging solar footprint.

Where are qcells solar panels made?

Seoul-headquartered PV solar-cell manufacturing giant Qcells today announced that it’s opening a new solar panel manufacturing facility in Dalton, Georgia. It’s a \$171 million expansion of Qcells’ existing solar module

manufacturing plant in Dalton, and that will create 470 additional jobs.

Can solar glass make c-Si photovoltaics?

SOLARCYCLE's new facility in Georgia will position the company as one of the first manufacturers of specialized glass for crystalline-silicon (c-Si) photovoltaics in the U.S., with the capacity to make five to six gigawatts worth of solar glass every year.
