

Germany's new energy storage battery company

Overview

HOUSTON, TEXAS (Editors at Energy Analytics Institute, 26.Mar.2025) — TotalEnergies, on the occasion of Patrick Pouyanné's participation in the Europe 2025 conference in Berlin, and in connection with the company's integrated development in Germany's electricity sector, revealed investment decisions for 6 battery storage projects with 221 MW of new storage capacity and an investment outlay of €160mn. Who developed the new battery storage projects in Germany?

The projects were developed by TotalEnergies affiliate Kyon Energy. Credit: JeanLucIcard/Shutterstock. TotalEnergies plans to invest €160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have been developed by TotalEnergies affiliate Kyon Energy.

Does totalenergies invest in battery storage projects in Germany?

TotalEnergies, on the occasion of Patrick Pouyanné's participation in the Europe 2025 conference in Berlin, and in connection with the company's integrated development in Germany's electricity sector, revealed investment decisions for 6 battery storage projects with 221 MW of new storage capacity and an investment outlay of €160mn.

Where are totalenergies' new battery energy storage systems coming from?

TotalEnergies is launching 221 MW of new battery energy storage systems developed by Kyon Energy in Germany, where the Company already has 100 MW under construction. Most of these batteries will be supplied by Saft, TotalEnergies' affiliate specialized in advanced battery technology, particularly in renewables.

When will totalenergies start building a battery power plant in Germany?

Construction began at the end of 2024, and commissioning is planned for early 2026. The launch of these projects marks a major milestone in TotalEnergies' development of battery energy storage capacity in Germany, where the Company has operations in the production, trading, aggregation

and commercialization of clean firm power.

When will a new battery storage project be commissioned?

The projects, with a total capacity of 221MW, are expected to be commissioned in early 2026. The projects were developed by TotalEnergies affiliate Kyon Energy. Credit: JeanLucchard/Shutterstock. TotalEnergies plans to invest €160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity.

How much money does totalenergies invest in New batteries?

In total, these projects amount to 221 MW of new storage capacity and an investment outlay of €160 million. These projects were developed by Kyon Energy, a TotalEnergies affiliate acquired in 2024, and most will use next-generation batteries supplied by Saft, a TotalEnergies affiliate and leader in advanced battery technology.
