

Greece Energy Storage System Equipment Procurement

Overview

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

How many energy storage auctions are there in Greece?

Greece's energy regulator has announced three separate auctions for standalone energy storage systems connected to electricity transmission networks. The application process for the first auction, which involves 400 MW of energy storage, will be open until July 10.

How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

What is Greece's energy storage program?

Greece's energy storage program will draw €341 million (\$372.3 million) from the European Union's post-pandemic recovery fund, which was approved last year by the European Commission. The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network.

How does Greece support energy storage projects?

Greece's subsidy support for winning energy storage projects in the upcoming tenders is generous. During the construction phase, all winning projects will receive a one-time payment of €200,000 per MW, which serves as a capital expenditure subsidy.

Which energy storage projects will be included in Greece's energy tenders?

The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network. The tenders exclude the island network of Crete, which was linked to Greece's mainland power grid in 2021.
