Overview

OTE was founded on 23 October 1949 as a successor to the Hellenic Telephone Company (AETE), which was established in 1926 to consolidate all such public and private telecommunications companies. Formerly, t.

Starting in , the Greek State gradually reduced its stake in OTE. Following an agreement between and Deutsche Telekom, as of 5 November 2008 each party held 25% plus one share of OTE. After.

- COSMOTE e-value (100%): Contact Center services.
- (100%): Technology products and telecommunications services.
- OTE ASFALISI INSURANCE AGENT (100%): A solely own.

The Museum of Telecommunications opened up to the public in 1990. It is housed in a 1000 m2 privately owned OTE building, in the district of 25 Proteos str., 14564 New – . The purpose of the Museu.

Who provides telecommunications in Greece?

Moreover, until 1949, telecommunications in Greece were provided mainly by private foreign companies: AETE, of which the main shareholder was Siemens und Halske (urban telephony) and Cable and Wireless (international telegraph and telephone communication), while domestic telegraphy and long-distance telephony belonged to the state.

What happened to telecommunications in Greece after WW2?

At the end of World War II, any telecommunications infrastructure in Greece that had escaped destruction was technologically outdated. The war, occupation and civil conflict had left destruction in their wake.

What is the best mobile broadband provider in Greece?

Vodafone Greece is another major contender, offering comprehensive mobile and fixed broadband services. Its mobile network provides average download speeds around 41.5 – 57.76 Mbps.

Why was telephony important in Greece?

In spite of the fact that the installation of public coin-operated telephones in remote areas was expensive and unprofitable for OTE, it was seen as vital to serving the general public and social needs. – International telephony: in 1948, Greece had telephone connections to just 15 countries.

How many countries did Greece have a telephone connection to?

International telephony: in 1948, Greece had telephone connections to just 15 countries. By 1959, it had telephone connections to all of Europe and most countries in America, Asia, Africa and Australasia. This resulted in a 2,044% increase in international calls.

How fast is broadband in Greece?

According to Speedtest Global Index data from April 2025, the median fixed broadband download speed reached approximately 120.82 Mbps, with an upload speed of 57.99 Mbps [source]. This places Greece around 93rd globally. However, these figures represent a national median, and actual experiences can vary significantly based on location and provider.
