

Guyana Photovoltaic Distributed Energy Storage Company

Overview

The GUY SOL initiative, funded by the Guyana/Norway partnership with an estimated investment of US\$83.3 million, aims to diversify Guyana's energy mix. In 2024, the Program is set to install 18 MWp of solar PV farms and battery storage systems in regions 2, 5, and 6. Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How much solar energy is available in Guyana?

As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh. In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main source of energy.
