

How much does an outdoor power supply cost in Poland

Overview

How does a supplier buy electricity in Poland?

In a competitive market, suppliers buy electricity on the Polish Power Exchange (TGE) or via bilateral contracts and then sell it to consumers. For most customers, the energy price portion has traditionally been a fixed rate per kWh (often set in a supplier's tariff or contract).

How much does electricity cost in Poland?

With the cost of electricity today in Poland it is 6.21 € cheaper to charge at the hours with the lowest price. Lighting is not the thing that uses the most electricity, but it can still be a good investment to switch to energy-efficient and LED lights. These provide up to 10x more light with the same amount of energy.

Does Poland support dynamic electricity pricing?

In summary, Poland's legal and market framework in 2025 fully supports dynamic electricity pricing, making it one of the first in the region to roll this out at scale to households, in line with broader EU energy market integration goals. By law, all large energy suppliers in Poland must offer dynamic pricing contracts as of 2024.

What is the largest source of electricity in Poland?

Coal: Coal (both hard coal and lignite) remains the largest source of electricity. In 2024, coal-fired power plants produced roughly 57-58% of Poland's electricity. This is a marked decline from about 70% in 2022, reflecting a steady downward trend.

What are the key factors affecting the power supply industry in Poland?

When exploring the Power Supply industry in Poland, several key considerations are essential for comprehensive understanding. The regulatory landscape is crucial, as Poland adheres to EU directives, which influence

energy production standards, emissions, and renewable energy targets.

How much electricity does Poland produce in 2024?

In 2024, coal-fired power plants produced roughly 57-58% of Poland's electricity. This is a marked decline from about 70% in 2022, reflecting a steady downward trend. As of early 2025, coal's share continues to fall – for the first time ever, coal dropped below 50% of generation in a single month (49.4% in April 2025).
