

How to check and replace the battery cabinet

Overview

What is a battery cabinet?

The battery cabinet contains components that carry high currents and voltage. A properly installed enclosure is earthed and IP20 rated against electrical shock and foreign objects. However, the battery cabinet is a sophisticated power system and only qualified personnel are allowed to install and service it. DANGER.

What should I know before installing or replacing batteries?

Before you install or replace batteries, consider all the warnings, cautions, and notes concerning appropriate handling. Do not disconnect the batteries when the UPS is in the Battery mode. Make sure that your replacement batteries are of the same number and type as the battery that was originally installed.

How safe is a battery cabinet?

A properly installed enclosure is earthed and IP20 rated against electrical shock and foreign objects. However, the battery cabinet is a sophisticated power system and only qualified personnel are allowed to install and service it. DANGER This battery cabinet carries lethal voltages.

How do I install a battery cabinet?

The battery cabinet installation must meet the following guidelines. Install the system on a level floor suitable for computer or electronic equipment. Install the system in a temperature and humidity controlled indoor area free of conductive contaminants and with sufficient air exchange. The battery cabinet dimensions are shown in Figure 2.

How do I remove a battery cabinet from a pallet?

For transportation purposes, the battery cabinet is bolted onto a wooden pallet. To remove the pallet, perform the following procedure: 1. Before you unload the cabinet from the pallet, use a forklift or other material handling

equipment to move the cabinet to the installation area.

Can a battery cabinet tip over?

The external battery cabinet is heavy. If the unpacking instructions are not closely followed, the cabinet may tip over and cause serious injury. Do not tilt the cabinet more than 10 degrees from the vertical or the cabinet may tip over. For transportation purposes, the battery cabinet is bolted onto a wooden pallet.
