

How to connect the input and output of the battery cabinet

✓ LIQUID/AIR COOLING

✓ INTELLIGENT INTEGRATION

✓ PROTECTION IP54/IP55

✓ BATTERY /6000 CYCLES

Overview

How do I connect a battery cabinet to an ups?

Connect the DC+ and DC- cables to the DC+ and DC- terminals. Connect the power cables in the UPS. If more battery cabinets are part of the solution, connect all battery cabinets to the UPS according to the diagram below.

Where should a battery cabinet be installed?

If the battery cabinet is installed adjacent to the UPS, the recommended installation location for the battery cabinet is on the right side of the UPS cabinet. This location will allow for future expansion using an external module. Cabinets can be permanently bolted to the floor or left standing on leveling feet.

How do you connect a battery to a cabinet?

Route the ground wire (from the field kit) from the ground stud in one battery cabinet, under the lower battery tray and through the cabinet-to-cabinet cable access area in the side of the cabinets, and attach to the ground stud in the other battery cabinet (see Figure 4-4). Hardware is provided on each ground stud.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 2 for line-up-and-match configuration view. Figure 2. Eaton 93PM 50 kW or 100 kW UPS and Two 93PM Integrated Battery Cabinets.

How do I wire a 93pm integrated battery cabinet?

Remove the IBC conduit landing plates to drill or punch conduit holes, or remove knockouts in the conduit plate. Use this procedure to wire standalone 93PM Integrated Battery Cabinets to the 93PM UPS cabinet. Verify the UPS

system is turned off and all power sources are removed.

How do you wire an Eaton 93pm integrated battery cabinet?

Interface Terminal Detail – Eaton 93PM Integrated Battery Cabinet-Small
Disconnect terminal block plug from terminal block to wire plug. Because of the battery shunt trip wiring route in the 93PM UPS cabinet, the wiring from the IBC shunt trip terminals to the UPS must use wire rated for 600V and Class 1 wiring methods.
