

How to replace solar base station batteries

Overview

Do I need to replace my base station's batteries?

If you're not certain which system you have, see the [Which Version of the SimpliSafe® System Do I Have](#) article. You will likely never need to replace your Base Station's batteries as they are rechargeable and meant to last. The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries.

How do I replace the battery in my solar panel?

To replace the battery in an Allsop Home & Garden solar panel, unscrew the screws and separate the two halves of the solar housing compartment. Remove the old battery and replace it with a new rechargeable battery. Insert the screws back into their holes and screw the two halves of the solar housing compartment back to together securely.

How to change battery in solar post light?

You can change the batteries in most solar lights by opening the battery compartment and replacing the old batteries with new, compatible ones.

How do I change the battery in my solar light?

To change the battery in the solar post light, turn off the light, open the battery compartment, remove the old batteries, and insert new ones with the correct polarity. [Can I Use Regular AA Batteries in My Solar Lights?](#)

.

How many batteries does the base station take?

The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps

below to replace them:.

Do solar light batteries need to be replaced?

Diminished brightness or shorter lighting duration even after a sunny day indicates that your solar light batteries may need replacing. Switching the batteries to another functioning solar light can help determine if the batteries are the issue.
