

Huawei Photovoltaic Microinverter

Overview

Where can I buy a Huawei solar inverter?

Shop Huawei solar inverter for your PV system. Huawei solar inverters for every system size at the best price with worldwide delivery on Europe-SolarStore.com.

Is Huawei a good inverter manufacturer?

In 2018, Huawei entered the home photovoltaic inverter market with a very successful product at a competitive price. Two years later, Huawei introduced the second generation of home hybrid inverters. Huawei is a Chinese consumer electronics, IT equipment, and solutions manufacturer founded in 1987 and headquartered in Shenzhen.

Can a Huawei inverter be used under a photovoltaic module?

Optimizers can be used under selected PV modules, and optimizers can be installed under each photovoltaic module. Huawei inverters even have a built-in IV voltage- current curve tester. Huawei inverters are equipped with the PID recovery function, which limits the degradation of photovoltaic modules by the PID phenomenon.

What is a second generation Huawei inverter?

The second generation of Huawei inverters hit the market in April 2020, two years after the first. The SUN2000-L1 series covers powers from 2kW to 6K, features two MPPT inputs and an operating voltage range from 100V to 600V. The SUN2000-L1 model is a hybrid inverter ready to connect to an energy storage facility.

What is the difference between a solar edge and Huawei inverter?

Most Solar Edge optimizers operate with a maximum voltage of 60V, which means that in the case of short strings the voltage may be too low, resulting in reduced inverter efficiency and reduced production. The Huawei inverter,

on the other hand, works efficiently with a voltage of 90V.

Do Huawei inverters enable Island operation?

Huawei inverters enable island operation to a limited extent. In addition to energy storage, island operation also requires the so-called back-up box. Thanks to the back-up box, in the event of a power grid failure, the inverter switches to island operation. After the failure is removed, the inverter switches to on-grid operation.

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 1200V Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, UPS Switching under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 8 Units Inverters Parallel
- ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation
