

Huawei container base station

Overview

Does Huawei storage work with container management platforms?

Currently, Huawei storage is able to interwork with mainstream container management platforms, including Kubernetes, OpenShift, VMware Tanzu, Rancher, Cloud Container Engine (CCE), DaoCloud, and Alauda. This helps enterprises build efficient, reliable, easy-to-use, and easy-to-maintain enterprise-class container clouds.

What is Huawei Cloud container engine (CCE)?

Huawei Cloud Container Engine (CCE) is a fully hosted Kubernetes service that lets you build, run, and scale containerized applications.

Is Huawei launching a dual-engine container solution?

Huawei has taken the lead in launching the industry's first Dual-Engine Container solution, which accommodates VMs and containers in the same resource pool.

What is Huawei ids1000c series container data center solution?

Huawei IDS1000C series container data center solution includes independent IT, power and cooling containers for standard configuration. Meanwhile, control container and 20ft-power container are optional.

What is Huawei ids1000a all-in-one container data center?

Huawei IDS1000A All-in-one container data center is a one stop infrastructure solution integrating power, cooling, cabinet, fire-control, cabling, monitoring, grounding and lightning system. Its two standard products include 40ft and 20ft. Above configuration can be partially customized according to customer needs.

Does Huawei have a tenant-level resource management system?

Huawei's solution has a tenant-level resource management system. A storage administrator can assign a tenant to each department and adjust the capacity quota and access quality of service (QoS) for each tenant on demand based on the storage resource dashboard.
