

Huawei s global market share in power supply for communication base stations

Overview

What is Huawei's share in the global communications equipment market?

Additionally, according to the latest statistics from market research firm Omdia, Huawei's share in the global communications equipment market (including small and large base stations) reached 31.3 percent last year, ranking first.

Why is Huawei still leading the global market?

The noticeable point is amid US sanctions, Huawei still leads the global market share and continues its leadership. In reasons behind these growing shares are the product cost and high demand from the Chinese market.

Why is Huawei still a top ranked company in the world?

Despite the US campaign to curb the use of Huawei's equipment, which is impacting the company's position outside of China, it still represented No 1 of global revenue share, up 7 percent year-on-year. " (Huawei) underscored its grip on the Chinese market, depth of its telecom portfolio, and resiliency with existing footprints," the report said.

Does Huawei have a mobile base station?

Industry-specific and extensively researched technical data (partially from exclusive partnerships). A paid subscription is required for full access. In 2021, Huawei accounted for 30 percent of the global mobile base station market, with Ericsson ranking second occupying 23.5 percent of the market.

Is Huawei still a US company?

Remarkably, although Huawei remains banned by the US government, the company still manages to dominate its competitors in terms of market share due to its products' cost advantages as well as the enormous demand from the domestic Chinese market.

Is Huawei a good telecommunications company?

Huawei, a Chinese company, has made impressive strides in the global telecommunications sector, serving as an excellent example of China's exceptional manufacturing capabilities. The company has demonstrated resilience, innovation and strategic market positioning despite challenges from the US and Western nations attempting to restrict its growth.
