

Hydrogen Energy Base Station

Utility-Scale ESS solutions

Overview

Where can I find hydrogen fueling station locations?

Visit the Alternative Fuels Data Center to find hydrogen fueling station locations in the United States. The following publications provide more information about NREL's hydrogen fueling infrastructure analysis activities and capabilities.

What is a hydrogen station?

Fundamentally, a hydrogen station is one of the refueling stations that provide compressed hydrogen gas for fuel cell vehicles to generate electricity to power the motor of the vehicle. Hydrogen stations provide fuel much in the way conventional filling stations do, providing either petrol or diesel.

What is a hydrogen refueling station?

Hydrogen refueling stations (HRSs) are key infrastructures rapidly spreading out to support the deployment of fuel cell electric vehicles for several mobility purposes.

Why are hydrogen stations important?

Hydrogen stations are crucial for the widespread adoption of hydrogen fuel. They provide the necessary infrastructure to refuel hydrogen-powered vehicles, making it easier for consumers to transition to this eco-friendly energy source. As the network of hydrogen stations expands, it paves the way for a cleaner, more sustainable future.

Should hydrogen stations be built?

Investment by the public and private sectors remains key to the increased network of hydrogen stations. Infrastructure: Compared to the building of hydrogen stations, it still remains under construction in many ways, especially outside major urban areas. Locating hydrogen as a fuel option for the mass market would require more stations.

Does h2stations provide information on the availability of a hydrogen station?

H2stations.org does not provide information on the current availability of a hydrogen station, but does provide a global overview of the existing, planned and completed infrastructure. If you wish to submit station data and/or images, please supply such according to this template and send it to webmaster@h2stations.org.
