

Iceland Airport Communication Base Station EMS

Overview

Which US military station was based in Iceland?

Naval Air Station Keflavik was the host command for all U.S. defense activities in Iceland.

Does Iceland radio offer satellite communication?

Iceland Radio offers satellite communication service to aircrafts through IRIDIUM and IMMARSAT. When HF conditions deteriorate, a satellite communication can be applied. If the aircraft is equipped with a satellite phone on board, pilots can call Iceland Radio centre when necessary.

What are the training levels for EMS personnel in Iceland?

The training levels which operate by default for EMS personnel in Iceland are those currently in use in the United States. Training for EMT Basic, and EMT Intermediate are directly comparable with the U.S. standards. There is not currently an official national training standard in Iceland.

Is there governing legislation for EMS personnel in Iceland?

There is limited governing legislation regarding the practice of EMS personnel in Iceland. Paramedics completing training in the U.S. are validated and certified by the Icelandic directorate of health.

How are air ambulances operated in Iceland?

In Iceland, most air ambulance service is accomplished using fixed-wing aircraft. This is due to the country's sparse population, bad weather, and large numbers of airports. Ambulances on the ground are organized according to the country's multiple Health Service Districts, but are centrally dispatched.

Can Iceland radio call aircraft?

Moreover, Iceland Radio can call aircrafts equipped with a satellite phone.

Aircrafts can request a phone patch to their company dispatch unit or to Medlink when necessary. Through HF and landline interconnection, Iceland radio can call and connect an aircraft to their company dispatch unit or to Medlink.
