

Install outdoor power supply in distribution room

Overview

What is a power distribution box?

Electric power is an essential element of every building and event, power distribution is the final delivery point of electricity. To make power safe and readily available for multiple users a rugged power distribution box is a good solution. Power Distribution Units (PDU) are often referred to as a Spider Box, Pagoda Box or a Circuit Box.

What is a portable power distribution unit?

It has been designed according to the North American needs of temporary power distribution systems, especially outdoor atmospheric conditions and safety measures. Portable Power Distribution Units are sized based on current draw and will come with the appropriate circuit protection devices.

What is a rugged power distribution box?

To make power safe and readily available for multiple users a rugged power distribution box is a good solution. Power Distribution Units (PDU) are often referred to as a Spider Box, Pagoda Box or a Circuit Box. For the sake of this article we will refer to them as PDU's.

How much does a power distribution unit cost?

Furthermore, the design needs to be economical, there are so many variations and specifications to follow that consumers may choose the wrong set-up for their needs. A typical domestic-level Power Distribution Unit costs around \$600, whereas the cost of a commercial scale PDU can cost in upwards of \$2000.

What is a power distribution unit (PDU)?

Power Distribution Units (PDU) are often referred to as a Spider Box, Pagoda Box or a Circuit Box. For the sake of this article we will refer to them as PDU's. They are used in temporary power situations to power tools, computers, fans,

HVAC units, and lights.

Do you need a temporary power distributor?

As electric supply lines are not available everywhere, you can always use an electric generator along with a temporary power distributor to build a safe power system for uninterrupted power supply. Apart from using these PDUs at temporary locations, they are also used in events where electric supply is easily accessible.
