

Ireland Walk-in Energy Storage Container

Overview

What is energy storage Ireland?

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Delivering the energy storage technologies to enable a secure, carbon free electricity system on the island of Ireland by 2035.

Will Ireland need more energy storage?

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

Can energy storage be deployed in Ireland?

Appropriate and timely regulatory and market design is therefore essential to allow the deployment of energy storage in Ireland at the scale required to achieve current environmental policy objectives. However, the current policy framework is unsuitable to deliver the volumes and types of energy storage we will require.

Does Ireland need a policy framework for energy storage?

A robust policy, regulatory and commercial framework is needed to allow the deployment of energy storage in Ireland at the scale required to achieve current renewable policy objectives and our long-term decarbonisation ambitions. However, the current policy framework is unsuitable to deliver the volumes and types of energy storage we will require.

What is RWE's lisdrumdoagh energy storage facility?

In June 2022, RWE assumed full operation of the Lisdrumdoagh Energy Storage Facility. With a capacity of 60 megawatts and 34 megawatt hours (MWh), this facility can feed electricity into the grid at very short notice to

offset fluctuations in electricity generation.

Is battery storage enough to meet Ireland's short-term reserve requirements?

The battery storage deployed today is enough to meet Ireland's short-term reserve requirements, but we are going to need a lot more energy storage from a variety of technologies with different capabilities by 2030. This will be essential to manage the large volumes of renewable generation necessary to meet our climate action targets.

Ireland Walk-in Energy Storage Container

Safety of Grid-Scale Battery Energy Storage Systems

We work together to promote the benefits of energy storage to decarbonising Ireland's energy system and engage with policy makers to support and facilitate the development of energy ...
