

Is Myanmar s 5G base station communicating

Overview

How fast is 5G in Myanmar?

On August 5th, Myanmar fourth mobile operator Mytel announced the launch of the first 5G network in Myanmar. The pilot was achieved using 3.5GHz frequency and reached 1.6Gbps download speed on a single handset device.

When will 5G be available in Myanmar?

According to the GSMA website, 261 operators in 101 countries started to deploy a 5G network by January 2024, while MPT will be included as a 5G service provider in Myanmar. “We are trying our best to bring world-class communication technology to the Myanmar users.

Why is 5G important in Myanmar?

If we use generators, it is difficult to supply diesel fuel.” Myanmar is gearing up for the rollout of 5G services nationwide, which have the potential to produce breakthroughs in socio-economic development by fostering digital evolution in industries such as agriculture, health and manufacturing.

Will Myanmar have a 5G rollout?

The government will likely require 5G licence holders to offer coverage nationwide, but this will present serious challenges, and only Myanmar’s major cities would be profitable in the near term. Other challenges to a 5G rollout include an immature handset ecosystem, although it is only a matter of time before 5G compatible devices are commonplace.

Will MNOs be able to deploy 5G in Myanmar?

utilise all or party of the 700 MHz band for 5G coverage. Regardless of whether MNOs decide to deploy 5G initially, Myanmar’s technology neutral regime gives MNOs the option to do so in the future. The delay will also allow an assessment whether any of the 700 MHz spectrum band should be further capacity band spectrum (namely the 1500 MHz.

Will MPT be a 5G provider in Myanmar?

MPT conducted LTE upgrades in Yangon and Mandalay last year. According to the GSMA website, 261 operators in 101 countries started to deploy a 5G network by January 2024, while MPT will be included as a 5G service provider in Myanmar.
