

# **Is there a high demand for solar panels in Zambia**

## Overview

---

Zambia's recent boom in the PV (photovoltaic) sector can be attributed to the population search for alternative energy sources to light up their homes and power businesses as the country continues to experience unreliable national electricity supply, and limited grid access. Why is Zambia embracing solar energy?

Zambia is one of the nation's leading the charge in embracing solar energy. Zambia's solar energy industry has undergone a tremendous transition in 2023, opening the way for a future that is cleaner, greener, and more robust. The potential for solar power generation in Zambia is enormous due to the amount of sunlight.

What is the potential for solar power generation in Zambia?

The potential for solar power generation in Zambia is enormous due to the amount of sunlight. The government and participants in the corporate sector have taken action to take advantage of this opportunity and tap into this renewable resource. There is a lot of potential despite the nation's existing solar capacities, which are close to 100 MW.

Is there a solar market in Zambia?

Yes, the Zambian solar market is growing. Although it is still relatively small compared to countries like Tanzania, there is much room for solar to grow due to the increasing electricity demand in Zambia. Currently, 95% of the electricity supply comes from hydropower, with less than 1% from other renewable sources.

What are some challenges of solar power in Zambia?

While Zambia has a high potential for solar power and the sector is growing, there are several challenges. These include inadequate standards for the off-grid sector leading to sub-standard products, and maintenance issues in rural areas with low population densities.

Which companies offer solar home systems in Zambia?

In Zambia, Vitalite offers pay-as-you-go home systems using modern mobile technology to help low-income households. Aurora Power Solutions also operates in the region, focusing on solar power.

What is the electricity demand in Zambia?

It is estimated that electricity demand in the country is growing at about 3 percent annually. There are three power producing and distribution companies in Zambia; (a) Zambia Electricity Supply Corporation Limited (ZESCO), a government-owned company (b) Lunsemfwa Hydro Power Limited and (c) Ndola Energy.

## Is there a high demand for solar panels in Zambia
