

Italian battery energy storage box processing

Overview

What is the future of energy storage in Italy?

MP: The future of energy storage in Italy is bright. With investments in technology, regulatory support, and declining costs, BESS will become a key pillar of Italy's transition to a sustainable energy future. Telis Energy is proud to play a role in this journey by originating, developing, and building high-quality BESS projects.

Which projects have a battery energy storage system been implemented?

Internationally, we have already implemented major projects such as the Tynemouth stand-alone storage system in the UK and the La Cabaña photovoltaic plant in Chile, which is equipped with a Battery Energy Storage System that ensures its efficiency and stability.

How important are Bess in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy's energy transition. With the ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

Why is Telis energy advancing Bess Technology in Italy?

MP: Telis Energy is committed to advancing BESS technology in Italy. We are deploying state-of-the-art storage solutions and building strategic partnerships to address sector challenges. We focus on innovation and collaboration to accelerate the adoption of BESS and make a significant contribution to Italy's energy transition goals.

What is Enel doing in Italy?

Enel is leading this revolution with advanced projects both nationally and internationally, thereby contributing to Grid stabilization and decarbonization. Since the 1980s, Italy has shown a constant propensity to innovate in the field

of "classic" renewables, with the use of hydropower and pumped storage systems.
