

Jordan Energy Storage Cabinet Power System

Overview

Is battery energy storage possible in Jordan?

In response to this, Fichtner in collaboration with the Jordanian Ministry of Energy and the transmission system operator, NEPCO, has analyzed the potential for battery energy storage and, in the role of Transaction Advisor, is providing support for implementing a pilot project.

Why should energy storage systems be installed in Jordanian power plants?

The lack of large energy storage systems prevents conventional power plants from running on maximum generation capacity, any extra generated power to the Jordanian electric loads will flow to Egypt via the tie line; installing large energy storage systems will enhance the electrical generation efficiency .

What is integrated energy storage system (IESS)?

Advantageous integrated energy storage systems (IESS) can be utilized for power systems' operations generating set units with maximum possible efficiency, optimizing of unit commitment, integrating of more renewable energy generators, and utilizing renewable energy generators as peak power plants.
