

Kuwait lithium iron phosphate portable energy storage OEM

Overview

What is lithium hexafluorophosphate in a LiFePO₄ battery pack?

The electrolyte in a LiFePO₄ battery pack serves as the medium for the transport of lithium ions between the anode and the cathode. It is typically composed of a lithium - containing salt dissolved in an organic solvent. Lithium hexafluorophosphate (LiPF₆) is a commonly used salt in the electrolyte.

What is the energy density of a LiFePO₄ battery?

Modern LiFePO₄ battery packs can achieve a gravimetric energy density of up to 180 - 200 Wh/kg, which is sufficient for many applications where weight is a crucial factor, such as in electric vehicles. In terms of volumetric energy density, values can reach up to 500 - 600 Wh/L.

What is lithium hexafluorophosphate?

Lithium hexafluorophosphate (LiPF₆) is a commonly used salt in the electrolyte. When dissolved in the organic solvent, LiPF₆ dissociates into lithium ions (Li⁺) and hexafluorophosphate ions (PF₆⁻), providing a source of mobile lithium ions for the battery's operation.

Kuwait lithium iron phosphate portable energy storage OEM

12V 20Ah Lithium LiFePO4 Deep Cycle Battery, Rechargeable ...

Shop 12V 20Ah Lithium LiFePO4 Deep Cycle Battery, Rechargeable Battery Up to 2000-7000 Cycles, Built-in BMS, Lithium Iron Phosphate for Solar, Marine, Energy Storage, Off-Grid ...
