

Latest East African New Energy Storage Policy

Overview

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

How many storage projects are under development in Africa?

In total, AFSIA says around 18GWh of storage projects are under development across Africa. Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement. He has previously been Managing Editor and Founding Editor of tech and other publications in Australia.

Should the energy transition be pursued within a country's energy security priorities?

In theory, the energy transition should be pursued within the broader framework of a country's energy security priorities, and yet the reality for a lot of LMICs particularly in Africa has been a decisive and even harmful binary between the two.

What is the environmental sustainability framework for energy sector projects?

Environmental sustainability framework for energy sector projects. Programmes to enhance energy sector technical capacity to comply with environmental management regulations established. A multi-sectoral energy sector committee to coordinate climate change matters established.
