

Liquid cooling device for battery cabinet

ESS

Overview

This system works by circulating a specialized dielectric coolant through channels or plates that are in direct or close contact with the battery modules. The fluid absorbs heat directly from the cells and carries it away to a radiator or heat exchanger, where it is safely dissipated.

Liquid cooling device for battery cabinet

Wattainer Liquid-Cooled Series

The Wattainer Liquid-Cooled Series features high-performance, liquid-cooled batteries housed in modular cabinets. This advanced liquid-cooling thermal ...
