

Lithium battery solar integrated machine 3000 watts

Overview

Will I be charged if I buy a 3000W solar inverter?

You won't be charged until the item ships. A revolutionary all-in-one solar inverter: the 3000W solar inverter has a built-in 60A MPPT charge controller and operates from 24V to 110V or 120V AC. With an efficiency of up to 99.9%, the solar charge module uses the most recent optimized MPPT tracking technology.

Can a solar inverter be used with a battery?

It is suitable for a maximum circuit voltage of 102VDC. The inverter can be used with batteries, but can also work without. The integrated solar charger optimizes the charging and discharging of the battery. Priorities can be assigned, where for example charging from the grid can be preferred over charging from the PV installation.

How many charging modes does a solar inverter have?

There are four charging modes: only solar, mains priority, solar priority, and mains & solar hybrid charging. The inverter's three LED indicators and LCD screen allow for the dynamic display of operating status and system data.
