

Lithium manganese oxide battery 48v 24ah battery pack

Overview

What is a 48V LiFePO4 battery?

Our 51.2V LiFePO4 battery is commonly called a "48V" battery to align with standard terminology in the industry. Many customers and applications have long used 48V lead-acid batteries, so maintaining this naming convention helps with easier understanding and compatibility.

What is a 48V lead-acid battery?

Many customers and applications have long used 48V lead-acid batteries, so maintaining this naming convention helps with easier understanding and compatibility. Technically, the battery's nominal voltage is 51.2V, reflecting the true voltage output of lithium iron phosphate (LiFePO4) cells, which operate at 3.2V per cell.

Do LiTime LiFePO4 batteries have a battery management system?

All LiTime LiFePO4 batteries come with an internal Battery Management System, which protects against under-voltage during discharge, over-voltage during charge, over-current during discharge, over-temperature during charge and discharge, and short-circuit protection – protects battery cells from damage.

How do you charge a lithium battery?

There are 2 ways to solve the problem: using an AC-DC lithium battery charger or an MPPT solar charge controller to charge it for 3 to 10 seconds, then the battery can be used normally. If you plan to store the battery for a long time, charge it to a SOC of 50% and perform maintenance every three months.

Lithium manganese oxide battery 48v 24ah battery pack

 LFP 48V 100Ah

48V LiFePO4 Lithium Batteries

Power your heavy-duty off-grid applications with LiTime's 48V lithium batteries--engineered for performance, safety, and long life. Ideal for solar systems, RVs, golf carts, homes, and ...
