

Madagascar Solar Off-Grid Inverter

Overview

Is off-grid solar a viable solution for Madagascar?

At present around a quarter of the population in Madagascar has access to electricity. Off-grid solar technology has proven to be a fast and effective solution to accelerate economic growth and sustainable development in regions where connection to the grid is still challenging.

How can off-grid energy access help Madagascar?

Off-grid energy access. Image source SNV A new collective investment of \$20.5 million into off-grid solar technology will help bring clean and affordable energy to more than 120 villages in Madagascar.

How will WeLight's new solar mini-grids benefit Madagascar?

The investment will enable WeLight to build and develop solar mini-grids to supply electricity to over 120 villages in Madagascar which currently have no access to the national electricity grid. The new mini-grids will provide residents in off-grid rural villages access to clean and affordable energy.

Does EIB support off-grid solar energy in Madagascar?

EIB Vice-President Ambroise Fayolle explained that the project continues their longstanding backing of off-grid solar energy in rural Africa, following successful projects in Benin, Chad, the Comoro Islands, Mozambique and Uganda. "I am very happy that we can now implement such a project in Madagascar.
