

Make your own battery outdoor power supply

Sample Order
UL/KC/CB/UN38.3/UL

Overview

Forget buying an over priced power station like a Jackery, Goal Zero, or other pre-built solar battery bank for your outdoor adventures. Instead, follow this guide and I'll make sure to answer all your questions about putting together your very own DIY power station.

The Battery Used in This Project: 122 Amp Hour Battery Upgraded Battery I Recommend (AGM): 100 Amp Hour AGM Battery Upgraded Battery I Recommend (LiFePO4): LiTime 100Ah Deep Cycle LiFePO4 Battery 100 Watt Solar Panel from Harbor Freight.

One important factor to consider when building this DIY solar power station: Since I've gone with a flooded lead-acid battery, it is extremely important to not drain the capacity past 50%. This is due to something called depth of discharge (D.O.D). Flooded.

Now that you've gathered everything you need for your DIY solar power station, it's time to get building! I began by drawing up a crude wiring.

We'd love to hear from you and see how your DIY power station turned out! DM us a photo or video of your project in action. Have any questions?

.
