

Mauritania 100MW energy storage project

Overview

Why should Mauritania build a battery-based electricity storage facility?

The project will enable the financing and construction of Mauritania's first large-scale battery-based electricity storage facility, enabling the country to make optimal use of its abundant solar and wind resources, and ensure a more reliable electricity supply.

How much energy does Mauritania use?

Some projects are emerging to benefit from solar, wind and biomass resources and to increase the access rate to the grid. According to RPTES/World Bank study, consumption of Energy Mauritania stands to 481.000 tonnes of oil equivalent (toe).

How does Mauritania contribute to energy security?

Through these multilateral partnerships, Mauritania affirms its commitment to continue implementing development projects that achieve its vision of energy security, in a way that serves the interests of citizens and enhances its capabilities in attracting investments.

How many turbines are there in Mauritania?

39 Siemens-Gamesa turbines, each with rated capacity of 2.625 megawatts. Is a major development project in Mauritania, aimed at providing renewable energy to the country. The power station is the largest wind power plant in Mauritania, with a capacity of 102.375 MW.

What is the largest wind power plant in Mauritania?

The power station is the largest wind power plant in Mauritania, with a capacity of 102.375 MW. The wind farm consists of 39 turbines manufactured by Siemens-Gamesa, each with a capacity of 2.625 megawatts. The power station is owned by of the German conglomerate Siemens and the Spanish wind turbine manufacturer Siemens Gamesa.

Will Mauritania become a leader in green energy?

“This project will position Mauritania as a leader in critical minerals, green hydrogen and energy storage, —driving job creation and expanding economic opportunities for all Mauritians,” said Demetrios Papathanasiou, Global Director for Energy & Extractives at the World Bank.
