

# Mauritania Energy Storage Project

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

## Overview

---

The World Bank Group today approved the Mauritania Development of Energy Resources and Mineral Sector Support Project—known as the DREAM Project—to boost green hydrogen development, expand energy storage, and support critical reforms in the mining sector. Why should Mauritania invest in a battery energy storage facility?

The project will finance Mauritania's first large-scale battery energy storage facility, enabling the country to harness its abundant solar and wind resources for more reliable electricity. This investment is critical to the success of Mauritania's Mission 300 Energy Compact, which aims to achieve universal access to electricity by 2030.

What is Mauritania's dream project?

NOUAKCHOTT, March 27, 2025 - The World Bank Group today approved the Mauritania Development of Energy Resources and Mineral Sector Support Project —known as the DREAM Project —to boost green hydrogen development, expand energy storage, and support critical reforms in the mining sector.

How does Mauritania contribute to energy security?

Through these multilateral partnerships, Mauritania affirms its commitment to continue implementing development projects that achieve its vision of energy security, in a way that serves the interests of citizens and enhances its capabilities in attracting investments.

Will Mauritania become a leader in green energy?

“This project will position Mauritania as a leader in critical minerals, green hydrogen and energy storage, —driving job creation and expanding economic opportunities for all Mauritanians,” said Demetrios Papathanasiou, Global Director for Energy & Extractives at the World Bank.

How will Mauritania increase its energy sources?

Mauritania aims to increase and diversify its energy sources. For example, it has developed an electricity plant that will be alimented by Banda gas . This facility should produce 350 MW in 2015 and will be connected to Nouakchott and Nouadhibou. Furthermore, the plant should produce 700 MW and could export electricity to Senegal and Mali .

Why should Mauritania invest in Dream?

This investment is critical to the success of Mauritania's Mission 300 Energy Compact, which aims to achieve universal access to electricity by 2030. DREAM is key to helping Mauritania estimate and promote its critical mineral potential through geological surveys.
