

Micronesia photovoltaic energy storage inverter installation

Overview

Why did the Micronesian government seek out PV & Bess?

The Micronesian government sought out PV and BESS for a grid-tied solution to support (PCU) Micronesia's power supplier. Installation of BESS supported power infrastructure at two locations:.

What is a gosolar inverter?

They are encased in ultra-high temp tempered glass capable of sustaining high wind loads (175 mph) and performing efficiently even in low light conditions and are backed by a 25-year warranty for minimum power output. GoSolar uses high efficiency low cost \$/watt micro-inverters by NEP™.

What is the warranty on micro inverters?

Backed by a 10-year manufacturer's warranty, your micro inverters will provide years of efficient service. Our flat rack is made of high-quality extruded aluminum. All the peripheral components are made with similarly high-grade aluminum or stainless steel.

What are photovoltaic modules made of?

We use high-efficiency photovoltaic modules built with a rugged anodized aluminum alloy frame. They are encased in ultra-high temp tempered glass capable of sustaining high wind loads (175 mph) and performing efficiently even in low light conditions and are backed by a 25-year warranty for minimum power output.
