

Mobile base station AC distribution box

Overview

What is a temporary power distribution box?

Temporary power distribution boxes and carts serve as hubs for connecting electrical loads. Power centers and portable power stations act as a combination transformer and distribution panel to regulate and distribute power from a 480V AC power source.

How many amps does a power distribution box have?

Our power distribution boxes range from 20-800 Amps and are well known for being durable, long lasting and safe. Load Master™ Series portable power distribution boxes are the first in the industry to feature outputs with adjustable current ratings to match specific application loads.

What are load master TM series portable power distribution boxes?

Load Master™ Series portable power distribution boxes are the first in the industry to feature outputs with adjustable current ratings to match specific application loads. These temporary power distribution boxes feature 1, 3 or 4 adjustable circuit breakers, with a range of amperage and voltage ratings.

What are temporary power distribution boxes & carts used for?

They are commonly used where power is needed on a temporary basis, such as construction sites, outdoor events, manufacturing facilities, and emergency situations. Temporary power distribution boxes and carts serve as hubs for connecting electrical loads.
