

Mobile base station power module Huawei

Overview

What are Huawei base stations?

Huawei base stations are universal and different types of base stations can be configured by flexibly combining basic modules and various cabinets. The basic modules are the baseband unit (BBU) and radio frequency module which includes radio frequency unit (RFU), remote radio unit (RRU), and active antenna system (AAS).

What is a Huawei bbu5900 base station?

With its advanced features and energy-efficient design, the Huawei BBU5900 base station is a scalable and future-proof solution, ideal for deployment across various environments, including urban, suburban, and rural areas.

What is Huawei apm30h?

The advanced power module with heat exchanger (APM30H) is used for Huawei wireless products outdoors. It is small and easy to transport. The APM30H supplies DC power to the distributed or separated macro base station in outdoor scenarios. It provides space for both the BBU and transmission equipment.
