

Mozambique energy storage project distribution latest

Overview

How much energy is available in Mozambique in 2023?

“Financial resources for renewables projects have grown steadily, with nearly USD 230 million available in 2023.” Including hydropower, renewables currently make up 70% of all energy produced in Mozambique. Hydropower has traditionally been the largest contributor to Mozambique’s power production.

What is Mozambique's energy potential?

The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which boasts a projected production capacity of 20 GW. More than half of this potential is in Mozambique. Existing power plants such as Hidroelétrica de Cahora Bassa (HCB) contribute significantly to the country’s energy production.

What is Mozambique's energy transition strategy?

Mozambique recently unveiled a game-changing energy transition strategy that is paving the way for heightened investment inflows and universal access to energy across the country.

Does Mozambique have a road to electrification?

THE ROAD TO ELECTRIFICATION: Mozambique has made significant progress in expanding its transmission and distribution network, with electrification rates climbing from 34% in 2021 to 67% in 2024 thanks to new and ongoing projects.

Does Mozambique use natural gas as a transitional fuel?

GAS IN THE ENERGY TRANSITION: With the largest natural gas reserves in sub-Saharan Africa, Mozambique is also focused on utilising clean gas as a transitional fuel for its power generation sector. A giant 2-GW combined-cycle gas turbine power plant is being planned in Beluluane, near Maputo.

What is Globeleq's first greenfield project in Mozambique?

The US\$36 million Cuamba Solar plant is also Globeleq's first greenfield project in Mozambique and the Group's first combined solar and storage plant in its operating portfolio.
