

N-type double-glass photovoltaic module model

Overview

The double-sided double-glass N-type module adopts a full-glass packaging structure of "glass + film (such as POE or EPE) + battery cell + film + glass", eliminating the traditional backplane, and the upper and lower glasses are tightly attached to the battery cell through the film.

N-type double-glass photovoltaic module model

Why Dual-Glass is the best solar panel technology for ...

What are the benefits of dual-glass PV modules for rooftop installations? Dual-glass structure has already become the standard for PV ...

For N-type Bifacial Technology, Dual Glass Structure is Preferred

Dual glass is the preferred structure for the rear side cover of the N-type modules because the glass-glass version can maximize the advantages of the N-type.
