

Netherlands Energy Storage Power Station Subsidy

Overview

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of 'time-shifting' battery storage with solar PV projects for next year, an acceleration of a larger €400 million-plus programme. How much money does the Netherlands spend on battery energy storage?

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of battery energy storage system (BESS) technology.

When will a new battery storage scheme open in the Netherlands?

The scheme is scheduled to open on Jan. 1, 2025, and end in 2034. The funding is part of a €416 million subsidy program that was announced last year. The Dutch government said it would allocate the funds from the climate package issued in 2022, with the subsidies to facilitate the deployment of 160 MW to 330 MW of battery storage.

How many energy storage facilities are there in the Netherlands?

The vast majority of the 20 MW of installed energy storage capacity in the Netherlands is spread over just three facilities: the Netherlands Advancion Energy Storage Array (10 MW Li-ion), the Amsterdam ArenA (4 MW Li-ion), and the Bonaire Wind-Diesel Hybrid project (3 MW Ni-Cad battery).

What is a €416 million subsidy?

The funds are part of a €416 million subsidy program announced last year to alleviate grid congestion. The authorities in the Netherlands have allocated €100 million in subsidies to the deployment of battery storage with solar projects for next year, as the country continues to struggle with a lack of power flexibility and grid limitations.

How much does a kWh subsidy cost?

The initial estimate for the subsidy is €0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily

involved in the analysis of the scheme until now.

What is g11.3 energy storage systems?

The “G1.1.3 Energy Storage Systems” programme is being developed to support lithium-ion technology for energy storage and power off-take facilities connected to the national grid. According to the Draft RRP Regulation:
