

Network communication signal base station

Overview

In the area of wireless computer networking, a base station is a radio receiver/transmitter that serves as the hub of the local wireless network, and may also be the gateway between a wired network and the wireless network. It typically consists of a low-power transmitter and .

Network communication signal base station

[Cellular Networks, Base Stations, and 5G RAN](#)

This routes the communication to the corresponding party on the fixed network or via other base stations. To communicate, a mobile user must ...
