

New energy stations operating in Romania

Overview

Key projects for 2025 include: the completion of the Iernut gas power plant, which will provide 430 MW of baseload production (a strategic project that was unlocked at the start of the current mandate, with an estimated completion date of June 2025); the commissioning of the Răstolița hydropower plant, which will add 30 MW of flexible capacity to cover consumption peaks; the Năvodari cogeneration plant, which will provide 80 MW of gas-fired power, a much-anticipated modern project; and private projects financed through the PNRR, which are expected to deliver 1,200-1,500 MW from renewable sources and other modern capacities. What are the different types of energy in Romania?

Other Energy Types: Nuclear energy, biofuels, LNG, and geothermal energy are all integral to Romania's diversified energy strategy. Romania's energy sector is characterized by opportunities in emerging areas such as hydrogen and LNG, alongside ongoing investments in renewable energy and nuclear power.

Is MAS Building a new power plant in Romania?

In central Romania, private developer MAS Group Holding is building a 1.7 GW steam and gas power plant that will replace outdated hard coal fired generation.

Is Romania a promising market for energy investments?

Romania's energy sector is characterized by opportunities in emerging areas such as hydrogen and LNG, alongside ongoing investments in renewable energy and nuclear power. The regulatory environment is evolving to support these developments, making Romania a promising market for energy investments.

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional €150 million will be invested in Romania's energy sector. "I

am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

Who can participate in a new energy storage project in Romania?

Eligible participants include Romanian economic operators – micro-enterprises, SMEs, large companies, newly established entities, and public institutions. The projects must focus on building new energy storage capacities in Romania," the minister stated.

Will Romania shut down coal-fired electricity by 5 years?

BUCHAREST, Sept 2 (Reuters) - Romania is negotiating with the European Commission to delay shutting down 2.6 gigawatts of coal-fired generation by at least five years, Romanian Energy Minister Bogdan Ivan said on Tuesday. Romania uses a mix of gas, coal, hydro, nuclear and renewables for electricity generation.
